461. Hamming Distance

Description (?tab=Description) Total Accepted: 27814 Total Submissions: 39114 Contributors: Samuri (/samuri/) Difficulty: **Easy** The Hamming distance (https://en.wikipedia.org/wiki/Hamming_distance) between two integers is the n positions at which the corresponding bits are different. Given two integers x and y, calculate the Hamming distance. Note: $0 \le x, y < 2^{31}$. Example: Input: x = 1, y = 4Output: 2 **Explanation:** $(0 \ 0 \ 0 \ 1)$ $(0 \ 1 \ 0 \ 0)$ The above arrows point to positions where the corresponding bits are different Subscribe (/subscribe/) to see which companies asked this question.
